Food Security Challenges

Supply Need: Climate change: crop failure
Flooding from cyclones
Drought within rainy season
Not expected to reverse

Demand: Increasing number of children arriving needing food : 5 miles away!

Annual inflation reaching 30%

Cost of stockpiling greatly increased

MV Solar Irrigation need is critical !

MALAWI FOOD CRISES 2026

"EVERYDAY LIFE IN THE VILLAGES"

Another year of 25% inflation and a poor harvest has made the food shortage even more acute this year. Many villagers, primarily women and children, are suffering severe hunger and roam the fields looking for a few kernels of maize, husks, or edible leaves left over from the harvest. Today we saw several groups of villagers searching for food near our new irrigation project at Chimwang'ombe. These women found firewood and some leaves to eat. These children, roughly 4-8 years old, were also digging for food and found some mice and bugs to eat. Both groups asked me for food but I didn't have any to offer them. I gave the children some of our empty water bottles and a fill up at our newly irrigated farm, which brought some smiles of appreciation. The Malawi Visions solar irrigated farms help bring desperately needed food to the children at the Ministry of Hope communities. . .. . Dave Frey

COURAGE

Malawi Visions Newsletter

Fundraiser 2026

Malawi Visions is holding a "Club Concert" fundraiser this year!

Malawi Visions is the development arm to Ministry of Hope, who operate six community centers in the most remote, and poorest, villages in Malawi, Africa. We replace otherwise never-ending "relief" with self-sustaining independence for 8,000 vulnerable orphan children struggling within chronic poverty and hopelessness. Our projects include developing solar infrastructure, advancing reading and education, and enhancing food-security, all while bringing relationship with Jesus Christ. We depend completely upon your donations, 100% of which support our programs.

Paul
