Pumpkin Carving Template #1

Use this template to get the best spooky Pumpkin face

Pumpkin Carving Template No. 1

- 1 Trim off the bottom of your pumpkin so that it sits flat.
- 2 Open the pumpkin and scoop out the contents with a spoon.
- 3 Tape the template to the pumpkin and use a pin to poke holes through the paper and into the rind. When you remove the template the design will be visible.
- 4 Carefully cut out the face.
- 5 To help your pumpkin last longer and stop the carved edges appearing wrinkled, rub all cut edges with petroleum jelly.
