DIY Pumpkin Bath Bombs

1 Mix the ingredients

Combine baking soda, citric acid, cornstarch, Epsom salt, and a skin-safe fragrance. Mix well.

2 Fill the mold

Press the mixture firmly into each cavity and pack tightly.

3 Let them set

Let dry completely, several hours or overnight.

4 Remove from mold

Gently pop the hardened bath bombs out.

5 Add the details

Decorate with a small cinnamon-stick-style stem and a faux leaf. Keep decorations out of the bath water.

6 Enjoy!

Drop one into a warm bath and enjoy a relaxing autumn soak.

Use cosmetic-grade ingredients and skin-safe fragrance; do not use food spices or decorative pieces in bath water.
