DIY Chocolate Eyeballs

With an ice cube mold!

1

Melt the chocolate

Melt white chocolate (and a little coconut oil if needed) until smooth.

2

Fill the mould

Spoon the melted chocolate into each cavity, filling to the top. Tap gently to remove air bubbles.

3

Remove and decorate

Once fully set, gently remove the chocolate spheres. Use edible markers or melted coloured chocolate to add the iris and red veins.

4

Enjoy!

Your spooky chocolate eyeballs are ready! Perfect for a Halloween party or a fun treat.

Top Tip!

Use different coloured edible markers or melted chocolate to create a variety of eyeballs!

Safety Notice:

Adult supervision is needed when melting chocolate. Check ingredients for allergies.
