
STAY ON COURSE

If you stay on course you will eventually arrive to your destination. Staying on course can become boring, tedious and monotonous. However, it is extremely rewarding in the end.

Staying on course implies doing the **SAME** righteous acts **REPEATEDLY** until the desired results are achieved. Doing the same righteous thing repeatedly prevents you from doing a new thing that is wrong.

Deviating onto alternative roads to find a shorter path towards your goal ensures that it will take you longer to get there. **SHORTCUTS WILL KEEP YOU CUT SHORT.** Patience is a virtue when you are working on achieving your goal.

Repetitiveness is an asset when you are trying to achieve your goal. Success is not achieved by doing a lot of new things. Success is achieved by doing the right things **REPEATEDLY.**

With all the distractions that's in the world, do not get side tracked. Stay the course! If you are saving money every month, continue. Do not get anxious and follow a get rich quick scheme.

If you are in college, study your major everyday. Do not get discouraged with the process by dropping out, thinking there's a better way to make it. Stay the course.

The #1 reason people fail is because they drift from doing what was right and gravitate to what is uncertain or wrong. You cannot reap the satisfaction of finishing what you started if you deviate from the course.

YOU WILL ONLY BE DEFEATED IF YOU ALLOW YOURSELF TO BE DISTRACTED.

Staying on course is sticking with a winning **ROUTINE**. Acts 20:24 says, *"I don't care about my own life. The most important thing is that I complete my mission, the work that the Lord Jesus gave me—to tell people the Good News about God's grace."*

To stay on course and complete your goal you have to have tunnel vision by ignoring negative words, rejecting distracting people and delaying gratification. If you stay on course, be consistent and ignore what is beside you there is nothing you cannot finish.
