
DON'T THINK BIG. THINK WISE!

The phrase think big seems like a logical train of thought. However, what is logical is **NOT** always right . The problem with thinking big is that you **OVERLOOK** what is small.

I'm not sure who came up with the phrase "*think big*" but this idea influences people to believe that thinking big will

**BIG IDEAS
CREATE
CHANGES.
HOWEVER,
SMALL DETAILS
CONTROL
CIRCUMSTANCES.**

produce big results. This is **NOT** true.

To provide big results, **DON'T** think big, think **WISE**. Wise thinking ensures you will receive big results without overlooking the small details. Wise people understand that small hinges opens big doors. A small remote controls a big television. A small key starts the ignition to a big car.

During this time it is imperative that you **DO NOT** overlook the details. The devil is not in the details. God is in the details. The details decide and define excellence. It is the details that create **UNIQUENESS**. In all things, the small things matter.

WISE THINKING HELPS YOU TO CONSIDER THE BIG THINGS, YET INCLUDE THE SMALL THINGS.

Pslam 37:23 says, "*The steps of a good man are ordered by the Lord: and he delighteth in his way.*" God orders the steps of a righteous person. This is wisdom calculated into action. Do yourself a favor and follow the Lord. The world thinks big but God thinks wise! Read the teaching "[How to take small steps.](#)"
