
A LESSON FROM THE FLOWER

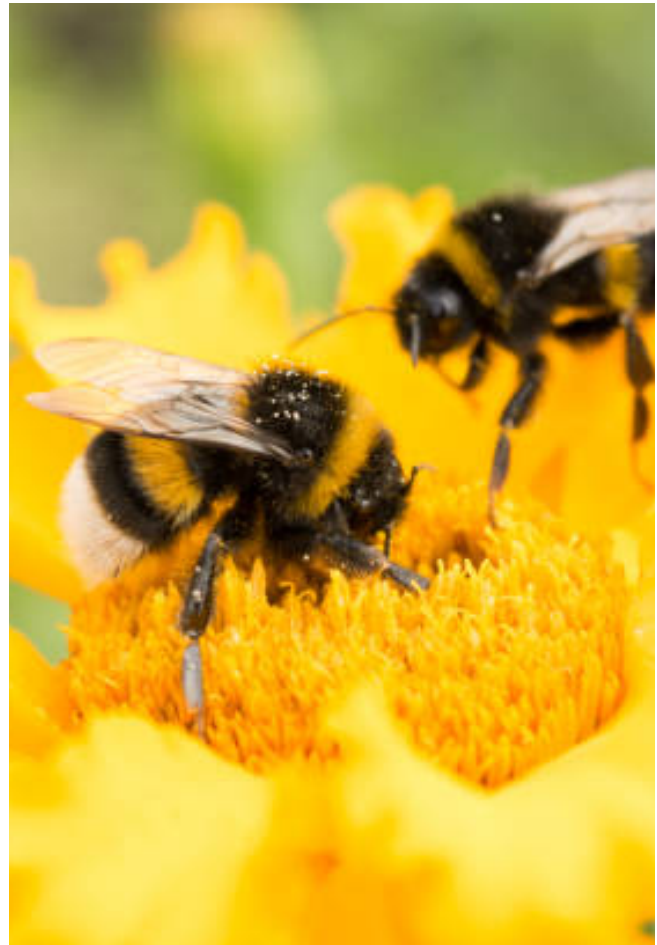

Flowers don't chase bees. Bees **CHASE** flowers. Think about that. A flower doesn't move, talk or do something that it's not. Flowers remain planted and bloom.

What does this mean? Flowers **ATTRACT** bees. This is the purest example of how the law of attraction works. When you focus on becoming the best version of yourself in **ALL ASPECTS** and maximizing your God given potential good people and things will pursue you.

If you focus on **BECOMING**, what you want will find you. During the spring time flowers reveal its beauty, fragrance, uniqueness and essence. Once it matures into its full potential the bees can't help themselves. They flock to the flowers for their nectar and pollen.

Be like the flower. **DEVELOP** yourself to the point where good things will find you, good vibes will chase you and opportunities will find you. Become a **MAGNET** for good things. One of the biggest mistakes that people make is chasing good things instead of working on themselves.

Nature has shown us that if you focus on doing what you were created to do and be who you were purposed to be **EVERYTHING** you need will come to you. The birds of the air never starve. The flowers in the ground receive water. The animals in the wild are provided with shelter.

**WORK ON BECOMING WHO GOD DESTINED YOU TO BE AND
EVERYTHING YOU WANT WILL BE DRAWN TO YOU!**

Mathew 6:33 says, "But seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you."
